# Introducing the new CleanFire Outdoor Wood Furnace

## PEACE OF MIND

Furnace operation couldn't be easier. Features you'll find only with the FireStar® combustion controller -

**Easy Refire** - saves the coal bed for quick, easy restarts

**Burn Time Monitor** - helps to estimate when you need to add wood

**Clean Reload** - Reduces smoke when you open the firebox door to add wood

## DURABILITY

The CleanFire's titanium-enhanced stainless steel firebox is impervious to corrosion from high-moisture wood, creosote, or condensation. Over 18 years of experience with no corrosion inside any stainless steel firebox.

## PERFORMANCE

Super heated gases enter the round chamber of the Afterburner and swirl in a turbulent vortex, creating a **Fireball** and allowing enough time for complete combustion to occur.

## AIR CONTROL

Air control is imperative for the cleanest, most efficient burn. When the furnace needs a lot of air, FireStar® instructs the stepper motors to open the air regulating discs precisely to deliver the amount of air needed.

## INNOVATIVE DESIGN

The CleanFire's patented Air Charge Tube keeps coals from falling into the Reaction Chamber and directs oxygen into the Fusion Combustor. There, oxygen mixes with the combustion gases and is focused down into the Afterburner. The Air Charge Tube also helps the furnace to relight faster.
